

Meet Nora, our sweet, beautiful 16 month old daughter. Nora was recently diagnosed with Shwachman–Diamond Syndrome (SDS). SDS is a rare genetic disease of the blood and bone marrow that affects Nora’s pancreas, liver, blood, and bones. It predisposes her to leukemia and other blood diseases, and results in a weakened immune system. Nora is the happiest girl and is loved by everyone who meets her. She has three beautiful big sisters who adore her: Maria, Emma, and Kayla. Nora has a huge support system behind her, but alone we can only do so much. We will do everything and anything we can for our baby girl. Raising awareness and funds is key to developing treatments and ultimately a cure. Please help us find a cure for SDS!

Turn HOPE into

ACTION

#CureSDS

Meet the Superinas!

Please consider sharing and donating to help support our efforts to discover treatments and a cure for SDS for our baby girl, Nora, and others like her.

To donate, scan our **QR code** on the left, which will take you to our donation page.

Or **text** "CureSDS" to 4-4321 for the main donation page.
